

Examples of Notices added to your Wordpress Website

In these rapidly changing times, it's important to keep your clients, existing and new, informed about any changes in your business. Brand Design can work with your existing Wordpress website to post notices, changes in hours, or new policies and procedures. Please call us at 540-341-0200.

We can add a pop-up notice to your homepage. The colors and fonts can be styled to go with your Wordpress website. A link can also be added to another page with a longer message.

The pop-up notice can look like a sticky note.

Another option is to add a banner at the top of your Wordpress website and link to an internal page with a longer message.

We are still working to keep your home running. See how we will **KEEP YOUR HOME SAFE** during the COVID-19 Pandemic! ☒
